***Allowable Subject Matter***

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

The Examiner is relying upon Applicant's arguments for the patentability of the instant claims, specifically Applicant's argument that Sawada, et al. do not provide that the molecular recognition layer where specific molecules are selectively recognized or that Hafeman, et al. in view of Marks, et al. do not provide that the depth of the potential well does not change in relation to the composition of a molecule and that electrical charges are injected to a plurality of potential wells, depth of which is variable in response to chemical quantity and therefore does not anticipate or render obvious Applicant's composition of same.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
